Response to Amendment

The examiner is in receipt of applicant's response to office action mailed 12/27/2005, which was received 4/26/2006. Acknowledgment is made to the amendment to claims 1,5,9,13,17,22,26, 31, and 35, leaving claims 1-35 as pending in the instant application. The examiner has carefully considered applicant's remarks and amendments and found them to be convincing, however, after further searching the following new grounds of rejection follows:

Examiner's Note

Examiner has cited particular columns and line numbers or figures in the references as applied to the claims below for the convenience of the applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant, in preparing the responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3625

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Anderson et al (US PGPub 2001/0042023) in view of Altendahl et al. (US 6,970,825)

In regards to claims 1-35, Anderson teaches all the features of the instant claims except as follows:

Anderson discloses identifying a local fulfillment site and designating the available parts for pick, pack and ship. Anderson also teaches backordering parts when not available locally and incorporating these back order parts with the original shipment based on customer input. Anderson, however, does not specifically mention that back-ordered items are consolidated within other shipments to the local pickup point.

Altendahl teaches the consolidation of shipments. It would have been obvious to a person having ordinary skill in the art at the time of the invention to include in Anderson, back-ordered items with other items that are destined for the same location because significant saving in shipment costs can be realized by combining items shipped to the same location at the same time.

Response to Arguments

Applicant's arguments with respect to claims 1-35 have been considered but are moot in view of the new ground(s) of rejection.
